Get ready for Seasons One and Two of the breakthrough Sci-Fi series *Sliders*!

Quinn (Jerry O'Connell), a brilliant grad student, has created a device that opens a wormhole to an infinite number of parallel universes where history has taken different paths. His first test trip goes awry, stranding his physics professor, Arturo (John Rhys-Davies), his friend, Wade (Sabrina Lloyd), and bystander Rembrandt "Crying Man" Brown (Cleavant Derricks) in parallel San Franciscos.

Now, this foursome of *Sliders* must travel from one alternate reality to another in the hope of somehow finding their way home.

1. Pilot (2 Hrs.)

While working in his basement, physics student Quinn Mallory creates a device that opens a mysterious gateway to parallel worlds. He invites his professor, Arturo, and his friend, Wade, to join him for a four-hour "test run" of the device, but they accidentally use too much power, causing the portal to suck them in indefinitely, along with Rembrandt "Crying Man" Brown. The four "Sliders" land on a world in the midst of a massive ecological disaster, and they must find a way to survive – together—until they can slide again.

2. Fever

The *Sliders* become trapped on a disease-ravaged world where antibiotics have never been discovered.

3. Last Days

The *Sliders* arrive in a parallel dimension where nuclear weapons have never existed – and a massive asteroid is on a collision course to destroy the Earth.
